

### An Insight Into Our Curriculum

Our curricula is encompassing that provides teachers with a framework that allows them to present each concept through multi sensory approach which leads to the development of critical thinking, linguistic skills, early learning skills, language skills, maths skills, science, music & movement & creative arts.

Ultimately our Kaleidoscopic Curricula aims to prepare the child to build long lasting relationship in real life situations and promoting strong self-esteem.

### Programs for Foundation Block

Nursery

K1

K2

Grade 1 & 2

### Nursery Program

The learning rate speeds up at this age, therein teachers lays out opportunities for the child to experiment to develop their cognition and emotion. This is the time we introduce the child to Pre-Maths, Pre-Language, Pre-Scientific concepts and much more. Introduce children to “personal choice time” which fosters independence. This programs to dedicate to creating a love for learning to ensure a successful transition into K1.

## K1 Program

Children dive further into literacy, logic, general knowledge, emotion and behaviour development through various activities that is derived from our well researched curriculum. The learning methods are more relaxed and children are allowed to learn by experimentation. They are given a semblance of confidence and help them interact in a better manner.

## K2 Program

In this last stage, we enhance their reading skills, writing skills, analytical skills, intra and inter personal skills. Language and literacy development is taken a notch further. Phonic skill is mastered in here, to help children read & comprehend. Basic Maths is incorporated in overall growth. Children will be in a more controlled and structured environment, for them to advance their skills that they have acquired at the previous level. Thus, on completing upper kindergarten with us, your child is fully equipped to enter first grade confidently!

## Grade I & II Program

Our Grade I & II curriculum will link new knowledge to what is already known by presenting new concepts in a conceptually and logically sequenced order. We focus on depth of understanding rather than breadth of content covered by providing students to practice and demonstrate discovery and activity based method. Our Curriculum incorporates language, models of enquiry, experiential learning and interdisciplinary connections and integration that helps student to connect learning to real world.

## OUR CURRICULUM OFFERS FOLLOWING SUBJECTS: (Nursery | K1 | K2)
